

Dmitriy Kerget

AI-ready Infrastructure Engineer | Cloud Network Engineer

Conroe, TX | info@kerget.com
Open to Remote, Hybrid, On-site, Relocation

Professional Summary

Senior Server Operations and Infrastructure Engineer with deep experience in VMware, Windows Server, Active Directory, networking, backup/recovery, monitoring, and production reliability.

Hands-on experience with Azure infrastructure, automation, private networking, secure API integration, and AI-ready cloud architecture using Azure AI Foundry, Azure OpenAI, Azure Functions, Static Web Apps, and MCP-based services.

Projects

Azure AI Agent Portal - Terraform + Azure (2026)

- Built reusable Terraform modules for VNet, subnets, routing, private endpoints, storage, Azure Functions, and Static Web Apps.
- Implemented CI/CD deployment with GitHub Actions.
- Designed secure private networking for Azure OpenAI and backend APIs.
- Demonstrated strong IaC, routing, API integration, and Azure networking architecture skills.

Core Skills

- Enterprise server and hybrid infrastructure operations across Windows Server, VMware ESXi, Active Directory, DNS, Group Policy, VPNs, backup/recovery, monitoring, automation, and production support.
- VMware ESXi, Windows Server, Active Directory, DNS, Group Policy, enterprise VPNs, Cisco FTD, Hyperflex, Meraki, routing, Veeam, Azure Backup, Terraform, PowerShell, monitoring, disaster recovery, and incident response.
- Terraform automation and IaC workflows with CI/CD.
- Hybrid infrastructure and network operations across Azure, data center, VPN, DNS, routing, firewalls, and secure enterprise connectivity.
- Server health monitoring, proactive alert response, root-cause analysis, production troubleshooting, outage recovery, and preventive infrastructure improvements.
- Backup administration, disaster recovery testing, geo-redundant failover design, and infrastructure recoverability planning.
- Secure enterprise connectivity, segmentation and zero trust.

Professional Experience

Cloud Network Engineer - Alcoholics Anonymous World Services, Inc. (Dec 2015 - Dec 2024)

- Direct Equinix colocation account, cage setup, security, and access control.
- Owned data center and vendor coordination across infrastructure, network, and service-provider teams supporting operational stability.
- Built repeatable Terraform deployments improving consistency and recovery speed.

- Supported production hybrid infrastructure integrating on-prem systems with Azure services, secure networking, monitoring, incident response, and operational reliability controls.
- Built privileged access architecture using Private Endpoints and Azure Firewall for 100 plus users.
- Performed deep packet-level troubleshooting resolving latency, MTU, and routing instability.
- Implemented firewall segmentation and DR failover topology across sites.
- Strengthened security posture and network isolation for enterprise workloads.
- Administered Cisco FTD firewalls, Hyperflex, Meraki, VPN, and core routing.
- Monitored production issues, triaged infrastructure incidents, performed root-cause analysis, and implemented corrective actions to restore service stability.

Network Administrator - ChefsDiet Acquisition Corp. (May 2007 - Feb 2015)

- Managed VMware ESXi, Windows Server, Active Directory, DNS, Group Policy, enterprise VPNs, backups, disaster recovery testing, and infrastructure automation.
- Configured firewalls, routing, access policies, and user provisioning.
- Administered backups, disaster recovery testing, and infrastructure automation.

Certifications

- Advanced Tools & Scripting with PowerShell - Microsoft.
- PowerShell for Active Directory - Microsoft.
- KnowBe4, Security Awareness, Cybersecurity, Ransomware.
- Azure AI Engineer Associate (in progress).

Education

- B.A., Physical Culture - State University of Physical Culture, Minsk, Belarus.
- A.S., Machine Construction - State College of Machine Construction, Minsk, Belarus.
